

CR-4KR

SOLID STATE MEDIA CRACKER®

Opens smartphones and tablets to remove batteries safely prior to device disintegration to avoid fire hazards.

KEY FEATURES:

- Supports existing security procedures to meet National Security Agency (NSA) and DoD requirements for the destruction of information on solid state memory.
- Opens smartphones, tablets and solid state media to harvest memory-containing circuit boards for destruction.
- Automatic, push-button operation with adjustable chamber to accommodate a wide range of solid state media sizes.
- Prevents common injuries that result from the use of alternative disassembly methods such as power drills, hammers, screw drivers and brute force.
- Use of the CR-4KR Solid State Media Cracker® will extend the lifespan of disintegration equipment by reducing wear and tear on grinding components as well as battery removal to avoid fire hazards.

PERFORMANCE AND SAFETY FEATURES:

Simply turn it on, adjust the chamber size, insert media and press start. An indestructible ram descends upon the media with the right amount of force to crack open the outer casing. The CR-4KR Solid State Media Cracker® accommodates common solid state media types, dimensions and casing materials.

EASY OPERATION:

- Indestructible ram and simple, push-button operation.
- A load meter guides the operator in achieving the optimal amount of breakage (enough pressure to release the circuit board without over-crushing to an extent the battery becomes a fire risk).
- Interlocking safety door protects the operator from flying debris.
- Includes a set of handheld pry tools. Operators are advised to wear PPE such as puncture-resistant gloves and safety glasses (not included).

SIN 339940

TECHNOLOGY	Patent pending. Device uses force to physically crack open solid state media.
OPERATION	Automatic (push button)
MEDIA SIZE	Accommodates all smartphones and tablets up to 8.6" x 12" x 1" (218mm x 305mm x 26mm) and solid state drives up to 2.75" x 4" x 0.375" (70mm x 102mm s 10mm)
DUTY CYCLE	Media Dependent
ACOUSTICS	The machine itself is silent; cracking and popping will be heard from the media as it's crushed
DIMENSIONS	17.9" x 18.3" x 23.3"(455mm x 465mm x 592mm)
WEIGHT	96 lbs/ 43.5 kg
INCLUDED	Handheld pry knife set and cleaning brush
MANUFACTURER	Made in the USA by Data Security Inc.® +1-800-225-7554 DataSecurityInc.com
