DEGAUSSER MAGNETIC FIELD VERIFICATION DEVICE

Sanitization Verification in the Palm of Your Hand

KEY FEATURES:

- Listed on the National Security Agency Evaluated Products List-Magnetic Degausser (EPL-Magnetic Degausser) and NSA/CSS-EPL-9-12A.
- Guarantee your degausser's effectiveness by measuring magnetic field strengths in multiple locations and multiple directions.
- Results are reported numerically on two digital displays.
- The rechargeable, battery-powered device ties into existing security procedures to meet NSA/CSS and DoD requirements for degausser testing and certification.

INSTANT VERIFICATION:

Instantly guarantee your degausser is working properly with Data Security, Inc.'s Compact Field CheckR®. Use daily, monthly or yearly--it's easy to incorporate into existing security procedures on your schedule to be confident your degausser is fully sanitizing media.

EASY OPERATION:

Simply turn it on, slide the Compact Field CheckR® and Chamber AdaptR* into the media chamber of your degausser, run the degausser cycle then view the results. The Compact Field CheckR® has the unique ability to measure the strength of magnetic fields present during the degaussing cycle then provides you with accurate, numerical results. Features simple push button operation, auto zero, digital display, low battery alert and automatic shut-off.

PATENTED TECHNOLOGY	Sensors measure magnetic fields from multiple locations and various directions to report results on two LED displays
OPERATION	Automatic (push button)
COMPATIBILITY	Approved for use with degaussers listed in the NSA EPL-Magnetic Degausser
CYCLE TIME	Degausser dependent
DUTY CYCLE	Continuous
POWER	Rechargeable battery
VIBRATION	Withstands extreme magnetic environments and the physical shock of bulk degaussers, as well as commercial shipping and handling conditions
DIMENSIONS	4" x 2.75" x 0.6" 102mm x 70mm x 15mm
WEIGHT	0.25 lbs / 0.11 kg
MAINTENANCE	Recharge as necessary, annual factory calibration and firmware updates are recommended
ACCESSORIES	Chamber AdaptR* sold separately 5.75" x 4" x 0.9" / 146mm x 102mm x 23mm
MANUFACTURER	Made in the USA by Data Security, Inc. 1-800-225-7554 www.DataSecurityInc.com

**The Compact Field CheckR is intended to be used solo in small chamber degaussers like the LM-1C. All other degaussers will require the use of the Chamber AdaptR (not included). Easy to use, simply drop the Compact Field CheckR® into the Chamber AdaptR (shown here) and insert in the degausser chamber.*
